- Post-tour community member feedback

- Thank you for the wonderful tour! My wife and I enjoyed it very much! We were wondering, do you have any recommendations for good books about the history of HPNS?
  - [The children, ages 7 & 9] loved it! Of course, some of the technical information in response to questions (which was of great interest to me) was a bit over their heads, but I was able to summarize for them the essence of the information in terms they could understand. It was a very well organized tour.
  - Thank you so much for the great opportunity! And for the wonderful tour! My wife and I enjoyed it very much!
